Abstract

Global health problems require global solutions, and publicprivate partnerships are increasingly called on to provide these solutions. But although such partnerships may be able to produce the desired outcome, they also bring their own problems. A first-of-its kind workshop in April, hosted by the Harvard School of Public Health and the Global Health Council, examined the organizational and ethical challenges of partnerships, and ways to address them.

Keywords: public-private partnerships, global health, organizational challenges, ethical considerations, globa
